1. Purpose and Scope

The Student Handbook provides a common reference for students enrolled at Northbridge Institute of Technology (NIT). It explains general expectations, academic behavior, campus services, safety practices, and routine administrative processes. The handbook should be read together with the Academic Regulations and Examination Guidelines.

The handbook applies to undergraduate and postgraduate students unless a program-specific rule states otherwise. Where a specialized program rule conflicts with a general handbook statement, the program regulation takes precedence for that program.

Students are expected to use official institutional channels for deadlines, notices, and requests. Verbal statements from individuals do not automatically amend a published policy.

2. Student Responsibilities

Students are responsible for maintaining accurate enrollment information, meeting academic deadlines, attending required learning activities, and complying with published examination procedures.

- Maintain an active student account and keep contact details current.
- Read official notices and course communications within a reasonable period.
- Submit work through the designated academic system before stated deadlines.
- Respect the learning environment, staff, visitors, and other students.
- Protect passwords, access cards, and other credentials assigned to the student.
- Report suspected safety incidents or serious policy violations through the appropriate channel.

Students should seek clarification early when a rule or deadline is unclear. Requests for exceptions should be supported by relevant evidence and submitted through the prescribed process.

3. Academic Conduct

Academic work must represent the student's own contribution except where collaboration is explicitly permitted. Plagiarism, unauthorized assistance, fabrication of results, and deliberate misrepresentation of academic work are prohibited.

Examples of unacceptable conduct include submitting another person's work as one's own, inventing experimental observations, using prohibited material during an assessment, and altering an official academic record.

The Examination Guidelines provide additional rules for examinations, including permitted materials, identification requirements, and procedures for suspected misconduct.

4. Attendance and Participation

Regular attendance supports academic progression. Unless a program or course specifies a higher requirement, students should maintain at least 75% attendance in scheduled instructional activities. The Academic Regulations define how attendance is calculated and how approved absences may be treated.

Activity	General Expectation	Record Owner
Lectures	Attendance recorded where scheduled	Course instructor
Laboratories	Attendance normally required	Laboratory instructor
Tutorials	Participation expected	Course instructor

Activity	General Expectation	Record Owner
Academic advising	Attend scheduled appointments	Academic advisor

Attendance is not the only measure of academic participation. Students should complete assigned work and comply with course-specific participation requirements.

5. Campus Facilities

NIT provides learning spaces, laboratories, a library, student service areas, and shared technology facilities. Facilities may have additional operating rules.

Library users should return borrowed material by the stated due date, maintain reasonable noise levels, and avoid damaging books, equipment, or furniture.

Laboratory users must follow posted safety instructions and may be required to complete an orientation before using specialized equipment.

- Do not remove equipment or institutional property without authorization.
- Keep walkways and emergency exits clear.
- Report damaged equipment promptly rather than attempting an unauthorized repair.
- Use institutional computing resources primarily for legitimate educational or administrative purposes.

6. Student Services

Student services include academic advising, enrollment support, library services, career guidance, accessibility support, and general administrative assistance.

Service	Typical Purpose	Student Action
Academic Advising	Course planning and progression	Book an advising appointment
Enrollment Support	Registration and records	Submit a service request
Library Services	Research and learning resources	Use library portal or service desk
Career Guidance	Career planning and employability	Register for an appointment
Accessibility Support	Reasonable academic support	Submit supporting documentation where required

7. Library and Digital Resources

Institutional digital resources may include learning platforms, electronic books, databases, email, and course repositories. Students should use these resources responsibly.

Credentials must not be shared. A student who suspects unauthorized access should change the password and contact the relevant support service.

Copyright and licensing restrictions apply to digital resources. Downloading or distributing material beyond permitted use may violate institutional or external requirements.

8. Health, Safety, and Emergency Practices

Students should follow posted safety instructions, participate in evacuation procedures, and immediately report hazards. In an emergency, students should follow instructions from authorized personnel and move to the designated assembly location.

- Do not obstruct emergency exits or safety equipment.
- Do not operate unfamiliar laboratory equipment without authorization.
- Report spills, electrical hazards, damaged equipment, or other hazards promptly.
- Follow building-specific evacuation instructions.

9. Conduct and Community Standards

NIT expects students to communicate respectfully and to contribute to an environment suitable for learning. Harassment, threats, deliberate property damage, and disruptive behavior are inconsistent with community standards.

Disciplinary processes should provide the student an opportunity to understand the allegation and respond through the applicable institutional process. Specific procedures may depend on the nature of the matter.

10. Administrative Requests

Students should use official forms or service channels for requests involving enrollment, records, fees, examinations, or scholarships. Each request should contain enough information for staff to identify the student and the requested service.

- 1 Identify the service or issue clearly.
- 2 Attach required supporting documents.
- 3 Submit the request through the designated channel.
- 4 Retain the submission confirmation.
- 5 Respond promptly if additional information is requested.
