

Northbridge Institute of Technology

Academic Regulations

Credit system, grading, registration, progression and graduation

Document code	NIT-AR-2026
Version	3.0
Academic year	2026–27
Effective date	1 August 2026
Applies to	All enrolled undergraduate (UG) and postgraduate (PG) coursework students
Document owner	Office of Academic Affairs
Approving authority	Academic Council

NOTICE This document is part of a fictional, synthetic knowledge base created solely for testing document-processing and retrieval software. Northbridge Institute of Technology, its offices, figures and rules are invented and do not describe any real institution.

Document Control

Title	Academic Regulations
Document code	NIT-AR-2026
Current version	3.0
Effective date	1 August 2026
Document owner	Office of Academic Affairs
Approving authority	Academic Council
Review cycle	Annual; interim amendments are issued through the Office of Academic Affairs
Scope	Credit system, grading, attendance, registration, progression and graduation for coursework programmes. Doctoral programmes are governed by separate regulations that are not part of this document.

Revision History

Version	Date	Summary of change	Approved by
1.0	August 2023	Initial consolidated regulations adopted by the Academic Council.	Academic Council
2.0	August 2025	Introduced the two-tier attendance standard (theory and laboratory) and the condonation limits.	Academic Council
3.0	August 2026	Added B.Tech Data Science, revised progression thresholds, restated grading and classification tables.	Academic Council

Appendix A Summary of Key Numerical Thresholds 15

CHAPTER 1

General Provisions

1.1 Purpose and Applicability

These Academic Regulations set out the academic rules of the Northbridge Institute of Technology (NIT) for the Academic Year 2026–27. They apply to every student admitted to a coursework programme listed in Table 2.1, from the date of first registration until the award of the degree or the end of enrolment, whichever is earlier.

The regulations should be read together with the Student Handbook (NIT-SH-2026) for conduct and campus rules, the Examination Guidelines (NIT-EX-2026) for examination procedures, the Fee Structure (NIT-FS-2026) for charges, and the Scholarship Guidelines (NIT-SG-2026) for financial awards. Where this document defines a numerical threshold, the other documents refer to that threshold rather than restating a different value.

POLICY AR-P01 In any matter on which a programme-specific rule conflicts with these Regulations, these Regulations prevail unless the Academic Council has approved the exception in writing.

1.2 Definitions

DEFINITION Academic Year – the period from the first Monday of August to the last day of the Spring Semester examinations, comprising an Autumn Semester and a Spring Semester.

DEFINITION Semester – a teaching term of 15 teaching weeks followed by the end-semester examination period.

DEFINITION Credit – the unit of academic workload assigned to a course, defined in Table 2.3.

DEFINITION Credits Earned – the sum of credits of courses in which a student has obtained a passing grade (D or better for theory courses; B or better for laboratory courses).

DEFINITION Working Day – any Monday to Friday that is not an Institute holiday.

DEFINITION Student Portal – the official online system through which registration, attendance, results and fee invoices are published; notices posted on the Student Portal are deemed delivered.

1.3 Academic Calendar Framework

The indicative weekly structure of each semester is shown in Table 1.1. Exact dates for each Academic Year are published by the Office of Academic Affairs (OAA) at least eight weeks before the Autumn Semester begins.

Table 1.1: Semester structure and key academic milestones

Milestone	Autumn Semester	Spring Semester
Semester commencement	First Monday of August	First Monday of January
Teaching weeks	Weeks 1 – 15	Weeks 1 – 15
Add/drop period	First 5 working days of Week 1	First 5 working days of Week 1
Internal Test 1	Week 6	Week 6
Internal Test 2	Week 11	Week 11
Last date for course withdrawal (grade W)	End of Week 8	End of Week 8
Attendance shortage list published	End of Week 14	End of Week 14
End-semester practical examinations	Week 15	Week 15
Final theory examinations	Weeks 16 – 17	Weeks 16 – 17
Declaration of results	Within 21 days of the last examination	Within 21 days of the last examination
Supplementary examination window	Last two weeks of January	First two weeks of July

1.4 Governance and Amendments

The Academic Council is the final authority for interpreting these Regulations. Amendments take effect only when approved by the Academic Council and published on the Student Portal. An amendment does not alter a grade or result that was declared before the amendment took effect.

CHAPTER 2

Programmes and the Credit System

2.1 Programmes Offered

NIT offers eleven coursework programmes through three schools. Each programme has a nominal duration, a minimum number of credits for graduation, and attendance and CGPA requirements that apply uniformly as shown in Table 2.1.

Table 2.1: Programmes, duration, minimum credits and attendance requirements

Code	Programme	Duration	Semesters	Minimum credits	Attendance (theory / lab)	Minimum CGPA to graduate
BT-CS	B.Tech Computer Science	4 years	8	160	75% / 80%	5.00
BT-IS	B.Tech Information Systems	4 years	8	156	75% / 80%	5.00
BT-DS	B.Tech Data Science	4 years	8	158	75% / 80%	5.00
BT-EE	B.Tech Electrical Engineering	4 years	8	164	75% / 80%	5.00
BT-EC	B.Tech Electronics and Communication Engineering	4 years	8	162	75% / 80%	5.00
BT-ME	B.Tech Mechanical Engineering	4 years	8	164	75% / 80%	5.00
BT-CE	B.Tech Civil Engineering	4 years	8	162	75% / 80%	5.00
BS-AM	B.Sc Applied Mathematics	3 years	6	120	75% / 80%	5.00
MT-CS	M.Tech Computer Science	2 years	4	72	75% / 80%	6.00
MT-SE	M.Tech Structural Engineering	2 years	4	72	75% / 80%	6.00
MB-TM	MBA Technology Management	2 years	4	80	75% / 80%	6.00

Attendance percentages are the minimum required per course; see Section 4.2. The School of Computing, School of Engineering and School of Sciences and Management administer the programmes as listed in Table 2.2.

Table 2.2: Programme codes grouped by school

School	Programmes administered	Level
School of Computing	BT-CS, BT-IS, BT-DS, MT-CS	UG and PG
School of Engineering	BT-EE, BT-EC, BT-ME, BT-CE, MT-SE	UG and PG
School of Sciences and Management	BS-AM, MB-TM	UG and PG

2.2 Definition of a Credit

Every course carries a whole number of credits derived from its weekly contact hours. A course is described by the notation **L-T-P-C** (lecture hours, tutorial hours, practical hours, credits) and its credit value is calculated as **C = L + T/2 + P/2**.

Table 2.3: Credit conversion by type of contact hour

Component	Weekly contact hours	Credits	Illustration (L-T-P-C)
Lecture	1 hour	1	MA201 Probability and Statistics: 3-0-0-3
Tutorial	2 hours	1	CS201 Data Structures: 3-2-0-4
Laboratory / practical	2 hours	1	CS207L Data Structures Laboratory: 0-0-4-2
Seminar	2 hours	1	CS390 Technical Seminar: 0-0-2-1 (seminar hours recorded as practical hours)
Project work	3 hours	1	Final-year project phases (see Table 2.5)

2.3 Credit Distribution of B.Tech Programmes

The credit requirement of each four-year B.Tech programme is distributed across six course categories. Mandatory non-credit courses (Environmental Studies and Professional Ethics) are additional and do not count towards the minimum credits.

Table 2.4: Credit distribution by course category (B.Tech programmes)

Programme	Basic sciences and mathematics	Engineering foundation	Programme core	Programme electives	Humanities and management	Project and internship	Total credits
BT-CS	24	20	72	24	12	8	160
BT-IS	24	20	68	24	12	8	156
BT-DS	26	18	70	24	12	8	158
BT-EE	26	22	72	24	12	8	164
BT-EC	26	22	70	24	12	8	162
BT-ME	26	24	70	24	12	8	164
BT-CE	26	24	68	24	12	8	162

2.4 Illustrative Semester Plan

Table 2.5 shows the standard semester-wise credit plan for BT-CS. Other B.Tech programmes follow the same pattern with credits adjusted to the totals in Table 2.4.

Table 2.5: Semester-wise credit plan for BT-CS (160 credits)

Semester	Theory credits	Laboratory credits	Project / internship credits	Total credits	Cumulative credits
Semester 1	16	4	0	20	20
Semester 2	16	4	0	20	40
Semester 3	17	5	0	22	62
Semester 4	17	5	0	22	84
Semester 5	17	5	0	22	106
Semester 6	17	5	0	22	128
Semester 7	12	2	4	18	146
Semester 8	10	0	4	14	160
Total	122	30	8	160	160

2.5 Course Code Structure

Course codes consist of a two-letter subject prefix, a three-digit number whose first digit indicates the year of study, and an optional suffix **L** for laboratory courses. For example, CS201 is a second-year Computer Science theory course and CS207L is a second-year Computer Science laboratory course.

Table 2.6: Course code prefixes

Prefix	Subject area	Prefix	Subject area
CS	Computer Science	ME	Mechanical Engineering
DS	Data Science	CE	Civil Engineering
IS	Information Systems	MA	Mathematics
EE	Electrical Engineering	HM	Humanities and Management
EC	Electronics and Communication	BA	Business Administration

CHAPTER 3

Grading System

3.1 Assessment and Grading Principles

Every credit course is assessed on a scale of 100 marks made up of an internal component and an end-semester component. The component weights and minimum marks for each type of course are fixed by ?? of the Examination Guidelines. Total marks are converted into letter grades and grade points using Table 3.1.

3.2 Letter Grades and Grade Points

Table 3.1: Conversion of total marks to letter grades and grade points

Grade	Description	Total marks (out of 100)	Grade points	Result
O	Outstanding	90 – 100	10	Pass
A+	Excellent	80 – 89	9	Pass
A	Very Good	70 – 79	8	Pass
B+	Good	60 – 69	7	Pass
B	Above Average	50 – 59	6	Pass
C	Average	45 – 49	5	Pass (theory); not a pass in laboratory courses
D	Marginal Pass	40 – 44	4	Pass (theory); not a pass in laboratory courses
F	Fail	0 – 39	0	Fail

NOTE A laboratory course requires at least 50 total marks to pass (see ??). A laboratory total of 40 – 49 marks therefore results in grade F even though the same marks would earn grade D or C in a theory course.

3.3 Special Grade Codes

Table 3.2: Special grade codes and their treatment in GPA calculation

Code	Meaning	When awarded	Grade points	Counted in SGPA/CGPA?
DT	Detained	Attendance below the eligibility floor or condonation refused (see Section 4.4)	0	Yes, as 0 points
AB	Absent	Absent from the final examination without an approved special examination	0	Yes, as 0 points
I	Incomplete	Result withheld pending completion of an evaluation or a disciplinary inquiry	–	No, until resolved
W	Withdrawn	Course dropped after the add/drop period and before the end of Week 8	–	No
MP	Malpractice	Examination misconduct finding of Level 2 or higher (see ??)	0	Yes, as 0 points
S / U	Satisfactory / Unsatisfactory	Mandatory non-credit courses	–	No

3.4 SGPA and CGPA

The Semester Grade Point Average (SGPA) is the credit-weighted mean of grade points in one semester; the Cumulative Grade Point Average (CGPA) is the same calculation over all semesters. Both are reported to two decimal places.

FORMULA $SGPA = \frac{\sum (\text{course credits} \times \text{grade points})}{\sum \text{course credits attempted in the semester}}$. $CGPA = \frac{\sum (\text{course credits} \times \text{grade points}) \text{ over all semesters}}{\sum \text{credits attempted over all semesters}}$.

Table 3.3: Worked SGPA example for a second-year BT-CS student

Course	Title	Credits	Grade	Grade points	Credits × grade points
CS201	Data Structures	4	A+	9	36
CS203	Discrete Mathematics	3	A	8	24
CS205	Computer Organization	3	B+	7	21
MA201	Probability and Statistics	3	O	10	30
HM201	Technical Communication	2	A	8	16
CS207L	Data Structures Laboratory	2	A+	9	18
Total		17			145

SGPA = $145 \div 17 = 8.5294$, reported as **8.53**.

3.5 Academic Standing

Table 3.4: Academic standing categories and consequences

Standing	Condition (UG)	Condition (PG)	Consequence
Good Standing	CGPA 5.00 or above	CGPA 6.00 or above	No restriction
Academic Warning	SGPA below 5.00 in a semester while CGPA remains 5.00 or above	SGPA below 6.00 in a semester while CGPA remains 6.00 or above	Written warning and mandatory advising meeting
Academic Probation	CGPA below 5.00 at the end of a semester	CGPA below 6.00 at the end of a semester	Credit load capped at 16 (UG) or 12 (PG); ineligible for scholarships (see Scholarship Guidelines (NIT-SG-2026))
Academic Dismissal	On probation for 3 consecutive semesters	On probation for 3 consecutive semesters	Required to leave NIT; appeal within 10 working days to the Academic Council

CHAPTER 4

Attendance Requirements

4.1 Computation of Attendance

Attendance is recorded for every scheduled class session by the instructor of record and published weekly on the Student Portal. Attendance in each course is computed separately:

FORMULA Attendance % = $(\text{sessions attended} + \text{creditable institute-duty sessions}) \div \text{sessions conducted} \times 100$, truncated to two decimal places (74.99% is not rounded up to 75%).

Institute-duty sessions (approved representation of NIT in academic, sports or cultural events) are counted as attended up to a maximum of 10% of the sessions conducted in the course. Other kinds of leave described in ?? of the Student Handbook do not count as attendance.

4.2 Minimum Attendance Requirement

POLICY AR-P02 A student must attend at least **75%** of the sessions conducted in each theory course and at least **80%** of the sessions conducted in each laboratory course to be eligible for the final examination of that course.

Attendance is assessed course by course; high attendance in one course cannot offset a shortage in another. The requirement applies equally to all programmes in Table 2.1.

Table 4.1: Attendance requirements, condonation ranges and consequences

Course type	Minimum attendance	Condonation range	Below the condonation floor
Theory courses	75%	65.00% – 74.99%	Grade DT; not eligible for final examination
Laboratory and practical courses	80%	70.00% – 79.99%	Grade DT; not eligible for end-semester practical
Mandatory non-credit courses	75%	65.00% – 74.99%	Grade U; course must be repeated

4.3 Condonation of Attendance Shortage

A student whose attendance falls within the condonation range in Table 4.1 may apply for condonation. Condonation is an exception, not an entitlement, and is decided by the Attendance Review Committee (ARC) constituted by the Dean of Academic Affairs.

1. The OAA publishes the attendance shortage list on the Student Portal at the end of Week 14.
2. The student submits an online condonation application with supporting documents within **3 working days** of publication.
3. The student pays the condonation fee of CU 500 per course (see ??).
4. The ARC decides each application by the end of Week 15 and records the decision on the Student Portal.
5. If condonation is granted, the course is marked *Condoned* and the student receives a hall ticket for that course.

Table 4.2: Acceptable grounds for condonation and required evidence

Ground	Evidence required	Remarks
Illness	Certificate from a registered medical practitioner with dates of illness	Certificate must cover the absence period
Hospitalisation	Admission and discharge summary	Considered together with any related recovery period
Family emergency	Written statement and supporting evidence	Reviewed by the Dean of Student Affairs
Institute activity beyond the duty cap	Letter from the Dean or faculty coordinator	Applies only to sessions above the 10% cap
Documented technical or system error	Instructor confirmation and portal log	Corrected attendance may be recorded instead of condonation

IMPORTANT Condonation is limited to **2 courses per semester** and **6 courses over the whole programme**. Attendance below the condonation floor cannot be condoned under any ground.

4.4 Consequences of Attendance Shortage

A student whose attendance is below the minimum and who has not been granted condonation receives grade DT in that course. A DT student:

- may not sit the final examination (or practical examination) of that course;
- is not eligible for a supplementary examination in that course, because supplementary examinations are available only to students who were eligible for the final examination (?? of the Examination Guidelines);
- must re-register for the course when it is next offered and pay the re-registration charge (see Section 5.5);
- is treated as having failed the course for the purpose of scholarship eligibility (see Scholarship Guidelines (NIT-SG-2026)).

NOTE Detention does not count as an examination attempt. Examination attendance eligibility is also described in ?? of the Examination Guidelines, which applies the thresholds defined here.

CHAPTER 5

Course Registration

5.1 Registration Process and Timeline

Registration for each semester is complete only when course selection has been confirmed by the OAA and the semester fee invoice has been paid. Table 5.1 lists the steps. Fee amounts and late payment rules are in the Fee Structure (NIT-FS-2026).

Table 5.1: Registration timeline for each semester

Step	Activity	Timing	Responsible
1	Course offering list published	4 weeks before semester commencement	Office of Academic Affairs
2	Academic advising meeting	Within the 3 weeks before commencement	Faculty advisor
3	Pre-registration window (course selection)	Opens 3 weeks before commencement; open for 7 days	Student
4	Fee invoice generated	2 weeks before commencement	Accounts Office
5	Fee payment due date	Friday before the first teaching week	Student
6	Registration confirmed	On receipt of payment	Office of Academic Affairs
7	Add/drop of courses	First 5 working days of Week 1	Student, with advisor approval
8	Late payment period (late fee applies)	Up to 15 calendar days after the due date	Student
9	Registration cancelled if unpaid	On day 16 after the due date	Office of Academic Affairs
10	Last date to withdraw from a course (grade W)	End of Week 8	Student, with advisor approval

5.2 Credit Load

Table 5.2: Minimum and maximum credit load per semester

Student category	Minimum credits	Normal maximum	Maximum with approval
UG, good standing	16	24	27 (CGPA 8.00 or above; Dean approval)
PG, good standing	12	20	22 (CGPA 8.00 or above; Dean approval)
UG, academic probation	–	16	Not permitted
PG, academic probation	–	12	Not permitted
Final-semester student with fewer credits remaining	None	Credits remaining	Not applicable

5.3 Add, Drop and Withdrawal

During the first five working days of the semester a student may add or drop courses without academic record, subject to the load limits in Table 5.2 and advisor approval. After this period a student may withdraw from a course until the end of Week 8; the course then appears on the transcript with grade **W**. Withdrawal after Week 8 is not permitted. Withdrawal from a course does not reduce the attendance record of other courses.

5.4 Prerequisites

A course with a stated prerequisite may be registered only if the prerequisite has been passed. The Dean may waive a prerequisite in writing for a student whose CGPA is 7.00 or above.

5.5 Re-registration of Failed and Detained Courses

A student who has received grade F (and has exhausted or chooses not to use the supplementary option, see ?? of the Examination Guidelines) or grade DT must re-register for the course when next offered. The student attends classes afresh, pays a re-registration charge of CU 1,000 per credit, and is assessed with all internal and final components. Internal marks from the earlier registration are discarded.

A student may attempt a course at most three times in total: one regular attempt and up to two supplementary attempts. Re-registration starts a fresh cycle of attempts.

CHAPTER 6

Academic Progression

6.1 Progression Thresholds

To register for certain semesters a student must have earned a minimum number of credits, which ensures that the student is keeping pace with the programme. The thresholds in Table 6.1 equal 75% of the nominal credits of the preceding semesters.

Table 6.1: Minimum credits earned to register for a semester

Programme group	To register for Semester 3	To register for Semester 5	To register for Semester 7
Four-year B.Tech programmes	30	60	90
Three-year B.Sc programme (BS-AM)	30	60	Not applicable
Two-year PG programmes (MT-CS, MT-SE, MB-TM)	27	Not applicable	Not applicable

A student below the applicable threshold may register only for failed or detained courses and for up to 10 credits of new courses, subject to the load limits in Table 5.2.

6.2 Probation and Dismissal

The conditions of Good Standing, Warning, Probation and Dismissal are set out in Table 3.4. A student on probation must meet the faculty advisor every two weeks and may not hold any office in a student body.

6.3 Maximum Duration of Study

A student must complete all requirements within the maximum duration of the programme, counted from the first semester of registration. The maximum duration is the nominal duration plus two years for UG programmes and plus one year for PG programmes.

Table 6.2: Nominal and maximum duration by programme

Programme code	Level	Nominal duration (years)	Maximum duration (years)	Latest semester count
BT-CS	UG	4	6	12
BT-IS	UG	4	6	12
BT-DS	UG	4	6	12
BT-EE	UG	4	6	12
BT-EC	UG	4	6	12
BT-ME	UG	4	6	12
BT-CE	UG	4	6	12
BS-AM	UG	3	5	10
MT-CS	PG	2	3	6
MT-SE	PG	2	3	6
MB-TM	PG	2	3	6

6.4 Break of Study

A student may apply to the Dean of Academic Affairs for a break of study of up to two consecutive semesters, for medical or other documented reasons. Break periods are excluded when the maximum duration is calculated. A student on break pays no tuition for the break period, but must pay a re-admission processing charge on return.

CHAPTER 7

Graduation Requirements

7.1 Requirements for the Award of a Degree

A degree is awarded when all conditions in Table 7.1 are satisfied.

Table 7.1: Conditions for graduation

Requirement	UG programmes	PG programmes
Minimum credits earned	As in Table 2.1 (120 – 164)	As in Table 2.1 (72 – 80)
Minimum CGPA	5.00	6.00
Outstanding F, DT, AB, MP or I grades	None	None
Mandatory non-credit courses	All marked S	All marked S
Final-year project	Passed with at least 50 total marks	Dissertation passed with at least 50 total marks
Industrial internship (B.Tech)	At least 6 weeks, marked Satisfactory	Not applicable
Completion within the maximum duration	See Table 6.2	See Table 6.2
Clearance of dues	No dues at Accounts, Library, Hostel and Laboratories	No dues at Accounts, Library, Hostel and Laboratories
Pending disciplinary action	No unresolved Class II or Class III case	No unresolved Class II or Class III case

7.2 Classification of Degrees

Table 7.2: Degree classification by CGPA

Class	CGPA (UG)	CGPA (PG)	Additional condition
First Class with Distinction	8.00 and above	8.00 and above	Completed within the nominal duration with no F, DT or AB grade in any semester
First Class	6.50 – 7.99	7.00 – 7.99	None
Second Class	5.00 – 6.49	6.00 – 6.99	None

7.3 Degree Award, Transcripts and Certificates

Degrees are conferred at the annual convocation. A provisional certificate is issued after the final result is declared and the clearance of dues is complete. Official transcripts and duplicate grade cards are issued on request and subject to the charges in ?? of the Fee Structure.

APPENDIX A

Summary of Key Numerical Thresholds

The table below consolidates the thresholds defined in these Regulations and shows where each is defined or applied.

Table A.1: Quick reference of academic thresholds

Parameter	Value	Defined in
Minimum attendance, theory course	75%	Section 4.2
Minimum attendance, laboratory course	80%	Section 4.2
Condonation floor, theory / laboratory	65% / 70%	Table 4.1
Condonation limit	2 courses per semester; 6 per programme	Section 4.3
Condonation application deadline	3 working days after the shortage list (end of Week 14)	Section 4.3
Institute-duty attendance cap	10% of sessions conducted	Section 4.1
Course withdrawal deadline	End of Week 8	Table 1.1
Pass mark, theory (total)	40 out of 100	??
Pass mark, laboratory (total)	50 out of 100	??
Maximum attempts per course	3 (1 regular + 2 supplementary)	Section 5.5
Minimum CGPA to graduate (UG / PG)	5.00 / 6.00	Table 7.1
Credit load, UG (min / normal max)	16 / 24	Table 5.2
Maximum duration (UG / PG)	Nominal + 2 years / nominal + 1 year	Section 6.3
