1. Examination Framework

The Examination Guidelines describe the procedures used for scheduled examinations at Northbridge Institute of Technology. They should be read with the Academic Regulations, particularly the attendance and assessment provisions.

An examination may be conducted in a classroom, laboratory, computer environment, or another approved location. The examination notice specifies the format and reporting time.

2. Examination Eligibility

Ordinary eligibility requires the student to be properly registered for the course and to satisfy the applicable attendance and academic conditions.

Condition	Standard Requirement	Evidence / Record
Course Registration	Student registered for the course	Registration record
Attendance	Normally at least 75%	Attendance record
Academic Status	No applicable restriction	Academic record
Examination Form	Submitted where required	Submission confirmation

A student below the standard attendance threshold may be required to undergo an eligibility review. Approval of an absence does not by itself remove every examination requirement.

3. Examination Pattern

A standard course may use a combination of internal assessment and a final examination. The actual pattern is specified in the course outline.

Component	Typical Weight	Maximum Marks
Internal Assessment	20%	20
Laboratory / Practical	20%	20
Final Examination	60%	60
Total	100%	100

Some courses may use a different structure, particularly practical or project-oriented courses.

4. Before the Examination

- 1 Check the examination timetable and venue.
- 2 Carry the required student identification.
- 3 Arrive at the venue before the reporting time.
- 4 Bring only permitted materials.
- 5 Follow seating and invigilation instructions.

Students should not rely on informal timetable changes. Only an officially published update should be treated as an examination schedule change.

5. Permitted and Prohibited Items

Item	Status	Notes
Student ID	Permitted / Required	Present when requested
Approved stationery	Permitted	Subject to course instructions
Non-programmable calculator	Conditional	Only where explicitly allowed
Mobile phone	Prohibited during assessment	Must be stored as instructed
Unapproved notes	Prohibited	Unless explicitly authorized
Smart wearable device	Prohibited	Must be stored as instructed

Specific assessments may impose additional restrictions. Students should check the instructions supplied for the examination.

6. Examination Conduct

Students must follow instructions from authorized invigilators. Communication with another candidate is not permitted unless the examination instructions explicitly allow collaboration.

- Do not access unauthorized materials.
- Do not copy another candidate's work.
- Do not attempt to obtain advance access to examination content.
- Do not impersonate another student.
- Do not remove examination materials unless instructed.

7. Misconduct Process

When suspected misconduct is identified, the examination may continue or be concluded according to the circumstances. The incident should be documented and referred through the applicable review process.

A finding of misconduct should be based on the applicable institutional procedure. Students should have an opportunity to respond to allegations through that process.

8. Passing Requirements

The standard synthetic grading scale in the Academic Regulations defines a passing grade as E or above, subject to any course-specific minimum component requirements.

Result	Overall Mark	General Outcome
A+	90–100	Pass
A	80–89	Pass
B	70–79	Pass
C	60–69	Pass
D	50–59	Pass
E	40–49	Pass
F	Below 40	Fail

A course may require a student to meet a separate minimum in the final examination or practical component. The course outline should be consulted.

9. Revaluation and Result Review

A student who believes a result contains an evaluation issue may submit a review or revaluation request within the published period. The request should identify the course, assessment, and reason for the request.

- 1 Obtain the published review window.
- 2 Submit the request using the approved form.
- 3 Pay any applicable review fee listed in the Fee Structure.
- 4 Retain the submission confirmation.
- 5 Review the updated result when issued.

10. Supplementary Examination

A supplementary examination may be offered for eligible students who have not achieved a passing result. Eligibility, scheduling, and maximum attempts are determined by the applicable academic rules.

A supplementary examination does not automatically waive attendance, registration, or other eligibility requirements.

11. Special Circumstances

Students who experience a serious and documented circumstance affecting an examination should contact the designated academic or examination service as soon as reasonably possible. Late requests may be subject to additional requirements.

12. Related Documents

Attendance and academic progression rules are defined in the Academic Regulations. Examination-related charges are listed in the Fee Structure. General student conduct expectations are described in the Student Handbook.
